

Interview Review

Review and Edit Responses

Question 1

Hello and welcome. I am an AI interviewer, and you are applying for the Senior Software Engineer - Mobile position at Rev. Rev is a company focused on providing reliable transcription, captions, and subtitles through an easy-to-use platform that supports a diverse community of freelancers and clients worldwide. Today, I will ask you 5 questions related to this job. If you need help or encounter any issues, you can click the button with the three dots below to let me know. Are you ready to proceed?

Yes

Question 2

Great to hear that. Let's start with the first interview question. Do you have at least seven years of professional software development experience, including substantial ownership of mobile or mobile-focused products?

Yes

Question 3

Have you built production-grade mobile applications using React Native? If so, what was your role in those projects?

The app I work on has both full-native views and React-Native views. My contribution for the React-Native side has been orchestrated by Claude Code, as I don't have any React-Native experience of my own. I work on providing an SDK such that our React-Native developers can use an API, and it is implemented natively in iOS (where I am
